

DAOs are the organizations of the future – they promise to decentralize human coordination and solve our biggest problems.

Today DAOs face new and unique challenges when it comes to governing and financing their operations.

Cofund

Vote  → Fund  → Deliver 

Cofund **derisks**
grant funding
so DAOs can
fund projects
confidently

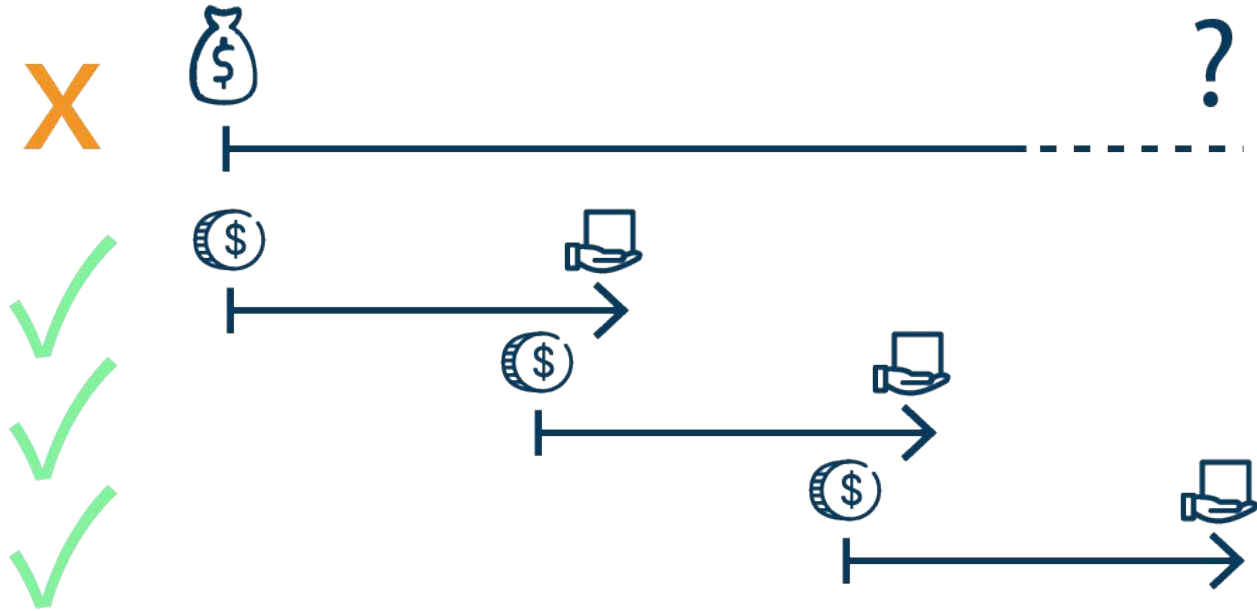

Main Problem: Incrementalism

Obstacle 1: Upfront & lump-sum payments

Obstacle 2: End-of-project evaluation

Main Problem: Incrementalism

uncertainty on value and outcome of large projects leads to focus on small, doable projects
-> grant fatigue for the **project team** and difficulty to plan for bigger goal

Obstacle 1. Upfront & lump-sum payments

full funds dispersed immediately after proposal selection

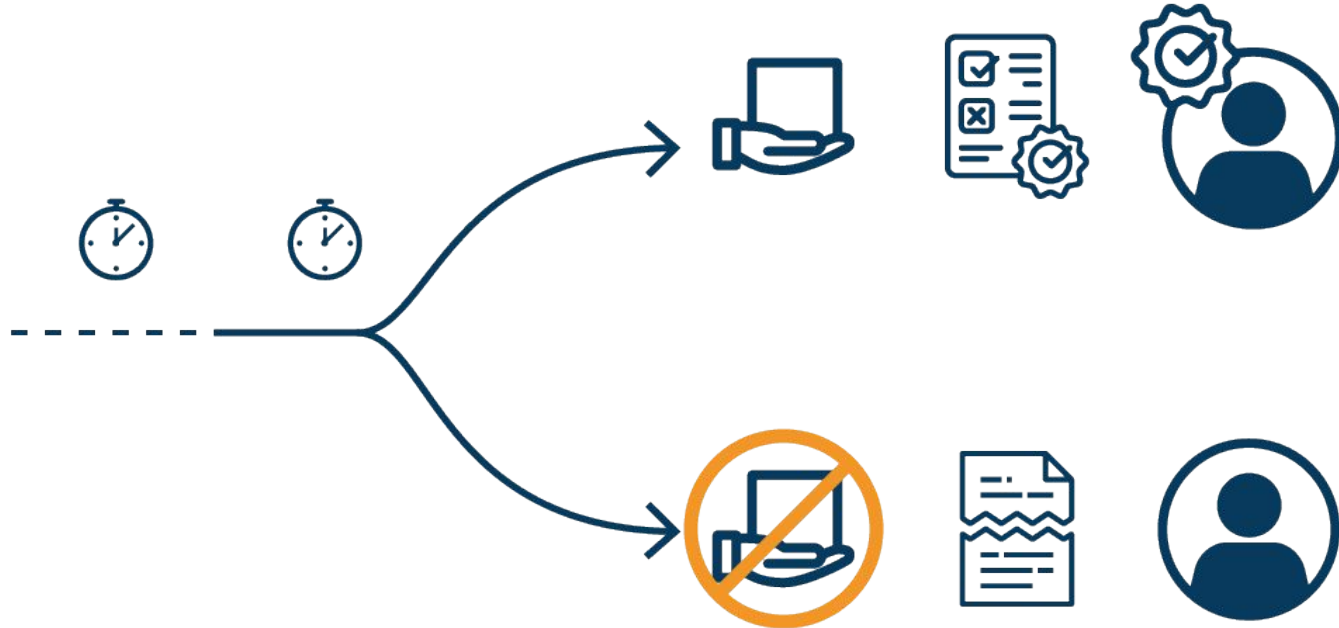

Solution 1. Continuous payments

Superfluid payment streams throughout project delivery

Obstacle 2. End-of-project evaluation

project results reviewed at completion when funds are already fully disbursed

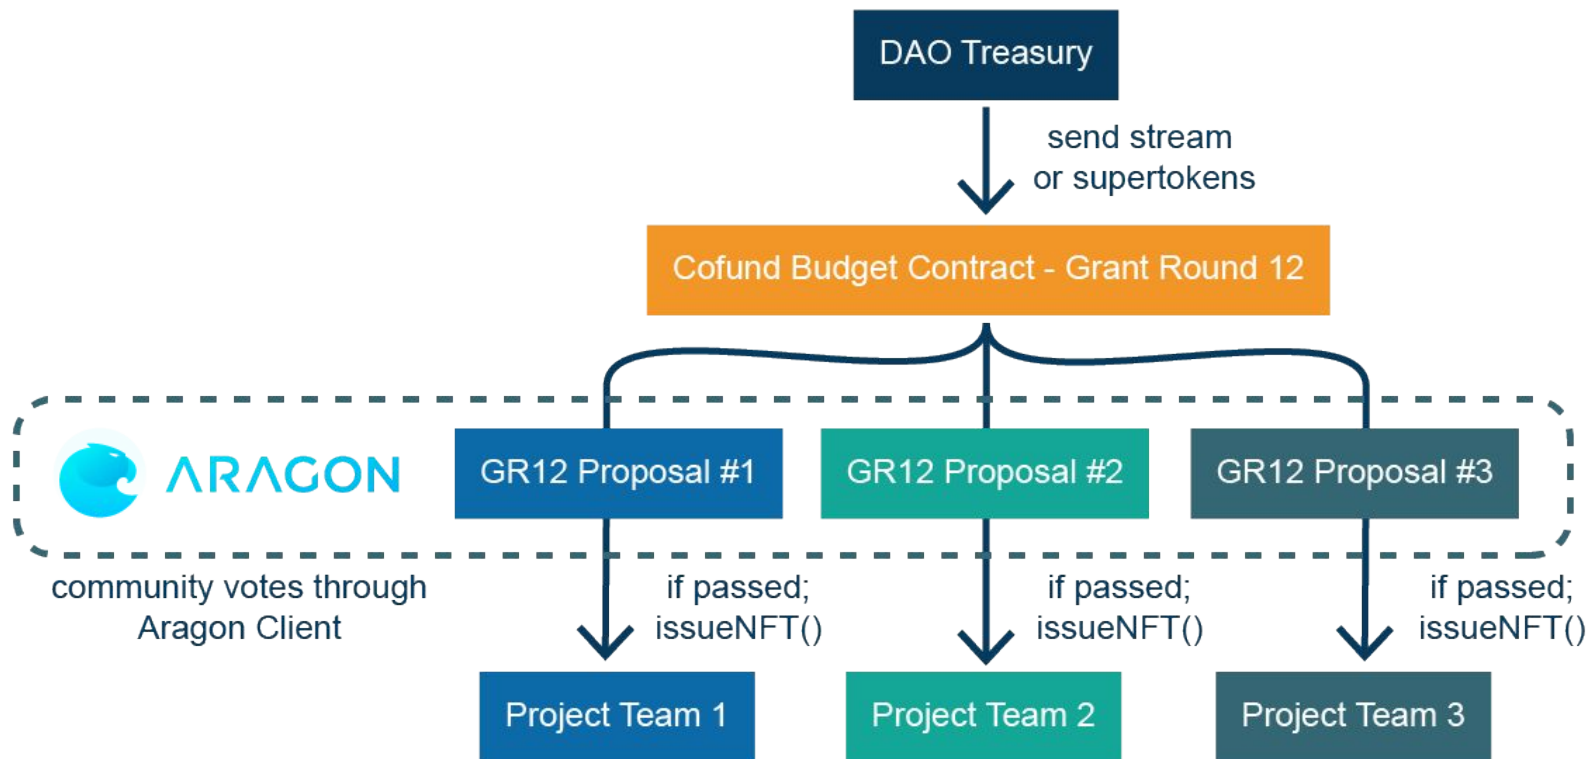

Solution 2. Multi-step evaluation

project reviewers check status throughout project delivery
